

WHAT YOU SHOULD LOOK FOR WHEN PURCHASING KRATOM

WHAT TO ASK FOR

Certificate of Analysis that assures the product is free from contaminants. (Note: you can request the original copy from the lab to be sure it is not a template that your vendor uses over and over).

Microbiology test stating that their product is what they say it is. This confirms it is not adulterated with dangerous levels of bacteria. (Note: this is the biggest concern of every state that has tried to make or has made Kratom a Schedule I substance).

Batch Number/Lot Number - a combination of letters, numbers and/or symbols to determine the complete history of manufacturing, packaging, labeling, and holding of the batch. Every product should have a Batch/Lot Number, as well as an expiration date.

Statement of Identity - what the product is (e.g. Maeng Da Powder)

Size/Weight - e.g. NET WT 30g

A phone number that someone actually calls you back on when you call him or her. If there is no number on the package or on the website we recommend you find another Vendor.

Companies not following GMP rules and regulations are ones that we strongly condemn. As a result, the BEA fully supports any government agency enforcing compliance in the realm of dietary supplements and kratom.

Premium Maeng Da Powder
SAMPLE FOR EDUCATION PURPOSES

Suggested Use: 1-2 grams on an empty stomach. Maximum dose in 24 hours is 2 grams.
